LIFEWare[®] Category Codes: Advantages and Disadvantages

This document describes the pros and cons of the Category Code for multiple-site facilities.

Available free from the software's Help menu

Creating Custom Forms

These step-by-step instructions will help you create custom forms with ease.

Available free from the software's Help menu

FAQ

This list of frequently asked questions and answers about the LIFEWareSM System covers many topics, including case open forms, case close forms, faxes, assessment forms, and reports.

Available free from the software's Help menu

LIFEWare[®] Ratings

Choose this option to view a complete list of items and descriptions for all ratings available in the LIFEWareSM System.

Available free from the software's Help menu

LIFEWare[®] Recommended Measures

Choose this option to view a list of the minimum measures that should be used to assess a particular condition.

Available free from the software's Help menu

LIFEWare[®] Tips

These tips, written by Dr. Carl Granger, will help you improve your LIFEWare[®] outcomes and get the most out of the LIFEWareSM System. Additional notes describe the development of the LIFEWare[®] Medical Rehabilitation Follow Along (MRFA) measures, the purpose of the LIFEWareSM System, and the advantages of Rasch transformation versus raw scores. Samples of the Case History Report and the Case Narrative Report provide in-depth understanding of the ways in which subscribers can use the system.

Available free from the software's Help menu

LIFEWareSM System Software Guide

This user manual educates the subscriber on how to use the LIFEWare[®] software. It includes descriptions of the software's main areas, including faxes, cases, assessments, reports, and administrative tools. Graphs and sample cases are provided as a source of learning. This guide should be used as a reference to supplement your initial software training. The guide is available on CD-ROM as a set with the clinical guide and report explanation guide. You can also download a PDF file free from the software's Help menu.

\$75 on CD-ROM (sold as a set) or available free from the software's Help menu

LIFEWareSM System Clinical Guide

This guide helps clinicians understand how to use the LIFEWareSM System to document outcomes and defines the LIFEWare[®] domains. The guide includes sample case studies and a glossary. The guide is available on CD-ROM as a set with the software guide and report explanation guide. You can also download a PDF file free from the software's Help menu.

\$75 on CD-ROM (sold as a set) or available free from the software's Help menu

LIFEWareSM System Standard Quarterly Report Explanation Guide

This guide can be used as a reference for interpreting the many available LIFEWare[®] reports, including demographic reports, summary reports, trend reports, and detail reports. The guide also includes a glossary of LIFEWare[®] terms. The guide is available on CD-ROM as a set with the software guide and clinical guide. You can also download a PDF file free from the software's Help menu.

\$75 on CD-ROM (sold as a set) or available free from the software's Help menu

The FIM System[®] Decision Trees (LIFEWare[®] version)

This educational resource explains how to rate all 18 FIM[™] items.

\$35

FIM[™] Mastery Test

This exam is used to test clinical staff on rating the FIM[™] instrument. The test should be given to all clinicians not knowledgeable on rating the FIM[™] instrument and to those who will use the Adult Day Assessment Form, the Neurological Cognitive Assessment Form, or the FIM[™] Addendum.

\$35 per test

Patient Data Entry Module

This module extends your use of the LIFEWareSM System by allowing your facility to use a designated PC for patients to enter data for custom forms.

\$300 annually

On-site LIFEWare[®] software training

This "hands-on" software workshop will train your staff to become proficient in using the LIFEWare[®] software.

On-site: \$975 plus expenses

On-site LIFEWare[®] report analysis

Experts from UDSMR will come to your site to analyze your facility's reports, including case/assessment reports, quarterly reports, and administrative reports.

On-site: \$975 plus expenses
