

# LIFeware<sup>SM</sup> System

5/9/12

## The LIFeware<sup>®</sup> Advantage

The LIFeware<sup>SM</sup> System is an Internet-based outcomes tracking system created specifically for the outpatient market. It is for those who value the importance of measuring functional status outcomes to:

- Monitor treatment effectiveness and efficiency
- Evaluate clinician performance
- Substantiate program quality
- Meet Joint Commission and CARF accreditation requirements
- Justify reimbursement
- Market to physicians or third party payers

The LIFeware<sup>SM</sup> System is used in a variety of settings, including:

- Outpatient rehabilitation
- Adult day healthcare centers
- Private practices
- Pain clinics
- Other outpatient settings

### LIFeware<sup>SM</sup> System Input: Condition-Specific Assessments

The LIFeware<sup>SM</sup> System uses assessments and measures to track patient and program outcomes. Patients and clinicians check boxes to respond to questions on a broad range of standardized assessment forms. Data is entered into the LIFeware<sup>SM</sup> System through a secured Internet connection. Entering data via the Internet provides the benefit of immediate report analysis, which makes the LIFeware<sup>SM</sup> System one of the most cost-effective outpatient outcomes tracking systems available.

### LIFeware<sup>SM</sup> System Output: LIFeware<sup>®</sup> Reports

#### Individual Patient Reports

Several types of individual patient reports provide longitudinal tracking and snapshots of the patient's progress.

#### Custom Forms

The custom form feature allows the user to create customized forms with the measures that are used most frequently, giving the flexibility needed when reporting on a condition or problem. For example, you can choose to use just the Shoulder Pain and Shoulder Function measures without using the ROM measure, making your form more conducive to the data you track.

#### Quarterly Program Management Reports

These reports help monitor program efficiencies, therapist outcomes, and provide comparative benchmark data to other programs.

- Demographic Report
- Summary Report
- Trend Report
- Detail Report

# Features and Benefits

# LIFEWare<sup>SM</sup> System

Features	Benefits
Self-administered questionnaires	Patients complete forms in your waiting room Instant patient feedback
Internet-based system	Fast, real-time reporting Saves time and money
Online data entry	Clinician or patient data entry options HL7 <sup>®</sup> interface capability
Powerful visual patient profiles	Display functional strengths and challenges Help pinpoint specific treatment needs Excellent resource for patient conferences
Quarterly national benchmark reports	Summarize outcomes of groups of patients Allow evaluation with similar facilities throughout the U.S.
More than 600,000 patient assessments	Large national database permits reliable statistical comparisons
Custom comparison reporting with analysis of sites and clinicians	Measures program and therapist efficiencies
Robust reporting options	Reduce manual tracking of quality indicators and patient feedback Assist with regulatory, Joint Commission, and CARF accreditation requirements
Powerful graphic reports	Effective marketing tool to referral sources, third-party payers, and consumers
Low annual subscription fee	Affordable outcomes solution
Customizable forms	Allow you to pick and choose measures of importance

## Comprehensive

The LIFEWare<sup>SM</sup> System contains assessment instruments and measures for evaluating patients across seven core functional domains:

- Physical Function
- Cognitive Function
- Mood or Affect
- Pain
- Social Interaction
- Role Participation
- Satisfaction with Treatment

## Wide-ranging application

The LIFEWare<sup>SM</sup> System tracks outcomes for a diverse range of patient populations, including those with the following impairments:

- Musculoskeletal conditions
- Neurological conditions
- Memory conditions
- Cardiopulmonary conditions
- Pain conditions
- Joint-specific conditions

## Cost-effective

- Low annual subscription fee
- No extra charge for patient reports
- No extra charge for standard reports (site vs. nation)
- E-mail patient outcomes reports directly to your referral sites
- No software to load or maintain (UDSMR automatically upgrades and manages the LIFEWare<sup>®</sup> software via the Internet)
- Subscription fee includes technical assistance, training, and support

## Meaningful Value

- Supports medical necessity documentation compliance
- Helps substantiate ongoing patient treatment with payers
- Includes measures to support compliance with the Physician Quality Reporting Initiative (PQRI)
- Provides a reliable and economical outcomes management system for your outpatient program
