The UDS-PRO[®] Advantage

Does your IRF PPS software provide optimal support? Does it assign CMG, LOS, and facility-adjusted reimbursement values at admission? Does it help you monitor compliance with the 60% Rule? Does it provide national and regional CMG-based comparative data for tiers, discharge settings, and FIM[®] ratings? If your IRF PPS software doesn't do these things, perhaps it's time to consider the **UDS-PRO[®] System**.

Feature

System features

Advantages

- Desktop/network and Internet software versions to suit your work environment
- Optional HL7[®] interfacing
- IRVEN and other vendor data conversions available for a historical database

Software tools

- Projected CMG, LOS, and facility-adjusted federal prospective payment
- Case-level IRF compliance status
- FIM[®] Track module for admission and discharge rating assistance
- ICD-9 lookups, validation checks, and advanced ICD-9 prioritizer
- Informatics data with national and regional CMG comparative data for tier distributions, discharge settings, and FIM[®] ratings
- Validation between function modifiers and FIM[®] items for distance walked/wheeled, bowel and bladder management, and tub/shower transfer
- The Mini-FIM[™] assessment tool, a 7-item preadmission screening tool with admission and denial tracking
- User-defined custom fields
- CMG export file for billing
- Dynamic export for custom reporting
- Patient satisfaction module
- Export files for transmission to CMS via the IBM/AT&T Global Network Dialer

Clinical expertise

- Recognized by the industry as the "clinical experts"
- Exclusive clinical and educational resources and consultative services

Database

- Largest independent database, representing more than 870 facilities (over 70% of all IRFs in the U.S.)
- RIC and CMG benchmarks are representative of the industry and provide stable performance targets

Reports

- Weekly refreshed national and regional comparative data
- User-friendly drill-down capabilities for RIC/CMG patient analysis
- Real-time reports, including case-mix index, 60% rule compliance, program management, goal attainment, and census
- Quarterly reports, including summary and detail reports for your executive team
- Scoring report graphs with nation-adjusted comparative data
